

The Restaurant and Hospitality Industry all share many of the same concerns when we talk about customer experience, health and safety, and maximizing

THE CLARITY AUTOMATED COMPLIANCE CHECKLIST. ILLUMINATES AND VALIDATES YOUR OPERATIONAL VISIBILITY

At Clarity IOT we have a solution to gather your operational information and convert it to usable information. This allows for increased productivity, better customer experience, and maximized product usage.

Know with confidence:

- You are getting the most use of your environment.
- Your customers are getting highest quality products.
- Your managers are certain equipment is being used effectively.
- Your facilities are covered with a reportable health and safety focus.
- Your managers receive notifications via email, text, and/or cell phone notifications anytime, anywhere.
- Validate timely monitoring.

Implementation:

We make it simple with a dedicated portal with your account to allow for one-click deployment.

This allows for your franchise owner or a corporate store to customize the installation and checklists.

The portal will be designed and labeled with your unique brand name and solution.

The ClarityIoT solution provides total security around your data:

- No Public Networks
- No Public Shared Cloud Storage
- No Public WiFi
- No Public open source LoRaWAN solutions
- No Open Source Zwave/ZigBee solutions
